

Ro-Ro Adaptor Pallet – for warehousing, transportation and in-store efficiency

With the Ro-Ro Adaptor Pallet, you can effortlessly change from wheeled logistics to Euro pallets and vice versa. It allows you to roll in, stack and secure four dolly stacks.

The 4-way forklift entry makes for fast loading and unloading – each stack of dollies can be rolled off the pallet without lifting.

As with all K. Hartwall adaptor pallets, Ro-Ro Adaptor Pallet is stackable, lockable and durable for low total cost of ownership.

Designed for following uses and industries:

Key benefits

- ✓ Reduced turnaround time
- ✓ Saves space in transportation and warehousing
- ✓ Compatible with automated conveyor systems
- ✓ No lifting needed

Technical specifications

External dimensions	1200 x 800 x 121 mm
Weight	36 kg
Surface treatment	Hot dip galvanised
Transportation in a 45' container/trailer	495 units
Stacking height	116 mm
